Q1 Sum and Average 10 marks

Write a Java program to find the sum and average of five numbers. Get the input from the user.

Your Code

```
1 import java.util.*;
2 public class Main{
3     public static void main(String[] args){
4         Scanner sc=new Scanner(System.in);
5         int a=sc.nextInt();
6         int b=sc.nextInt();
7         int c=sc.nextInt();
8         int d=sc.nextInt();
9         int e=sc.nextInt();
10        int sum=a+b+c+d+e;
11        double avg=sum/5.0;
12        System.out.println("Sum="+sum);
13        System.out.println("Average="+avg);
14    }
15 }
```

Input

10 20 30 40 50

Output

```
Sum=150
Average=30.0
```

Q5 Armstrong Number 10 marks

5/5 answered

Q2 Days Conversion 10 marks

Write a Java program to convert the given number of days into years, months, weeks and days.

Your Code

```
1 import java.util.*;
2 public class Main{
3     public static void main(String[] args){
4         Scanner sc=new Scanner(System.in);
5         int days=sc.nextInt();
6         int years=days/365;
7         days=days%365;
8         int months =days/30;
9         days=days%30;
10        int weeks=days/7;
11        days=days%7;
12        System.out.println("Years="+years);
13        System.out.println("Months="+months);
14        System.out.println("Weeks="+weeks);
15        System.out.println("Days="+days);
16    }
17 }
```

Input

400

Output

```
Years=1
Months=1
Weeks=0
Days=5
```
